This hypothetical illustration is based on the following assumptions:

The indicated contribution rate remains constant throughout the periods shown. Your account increases at the hypothetical annual rate of return of 7% compounded annually. You make neither withdrawals nor loans. All earnings are reinvested. IRS limits on compensation and pretax contributions apply. Current limits are indexed and adjusted for cost-of-living increases using a hypothetical inflation rate of 3% annually. All calculations assume contributions are made the last day of the year.

All investments involve some degree of risk. The funds are offered by prospectus, which contains more complete information regarding the investment objectives, risks, charges and expenses associated with an investment in the fund. Please be sure and review the prospectus before deciding to invest.
