Galena Park ISD Recognizes Microsoft TEALS at October Board Meeting

Houston, Texas: At the October 10th Galena Park ISD (GPISD) Board of Trustees meeting, GPISD recognized Microsoft Technology Education and Literacy in Schools (TEALS) for their partnership with the GPISD Career and Technical Education (CTE) program.

Technology Education and Literacy in Schools (TEALS) is a Microsoft philanthropic program that builds sustainable Computer Science (CS) programs in high schools. They focus on serving underrepresented communities in the Computer Science industry. The TEALS program provides industry professionals and volunteers to work with teachers to present computer science curriculum to students.

TEALS is currently partnered with a computer science class at North Shore Senior High School. GPISD students are expanding their knowledge in coding, software development, engineering, and programming.

A plaque was presented to a Microsoft Technology Education and Literacy in Schools (TEALS) representative on behalf of the Board of Trustees and Dr. John Moore, Superintendent of Schools.
