Galena Park High School Robotic Team Heads to World Championship

Houston, Texas: Galena Park High School's robotics Team KAOS competed at the South Texas VEX Robotics State Championship along with seventy-seven other top teams from across state on Saturday, February 24, 2018.

Robotics coach, Paul Johnson said, "We used a unique defense strategy that toppled the competition round after round earning us a division finalist spot, which also qualified us to compete at the VEX World Championships this year!"

This will be Johnson's 6th trip to the prestigious competition with Team KAOS!

Members of the robotics team will work countless hours over the next few weeks strategically calibrating their robot to perform at its optimum level at the VEX World Championships in Louisville, Kentucky.

Galena Park ISD wishes KAOS the best as they compete with over 500 teams from 54 countries around the world in April.
